DETAILED ACTION

Priority

Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows: An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification of in an application data sheet (37 CFR 1.78(a)(2) and (a)(5)). The specific reference to any prior nonprovisional application must include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.

The declaration claims priority to 09/752,629, but the specification and file make reference to 09/752,503. Correction is required.

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:
The specification to which the oath or declaration is directed has not been adequately identified. See MPEP § 601.01(a).

Reference to the priority application in either the oath or the specification must be corrected.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3-6, 9 are rejected under 35 U.S.C. 102(e) as being anticipated by
Liaw, USP 6,264,862.

The cited reference teaches the claimed invention including reducing the viscosity of a fill paste material within a paste mixing apparatus that further includes a paste storage tank. The apparatus includes a heating unit used for heating the paste to reduce its viscosity prior to exporting the paste through an outlet opening. The fill material is preferably used to fill the holes of an electronic substrate using a dispensing apparatus and a stencil. Heat and pressure are applied to the paste to supply the paste to the board, making a void-free paste and curing the paste to fill the holes as desired. See col. 1, lines 55-65; col. 2, lines 50-65; col. 3, lines 30-60; col. 4, lines 45-65.

Note that heater 20 is provided to heat the fill material to 40-90°C, which meets claims 3-4, as it is believed the temperature of the material starts at least at room temperature. Note that an electrical processing unit controls the heater. See col. 1, lines 55-65 (general reference); col. 4, lines 45-65.

Allowable Subject Matter

Claims 2, 7, 8, 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. USP's 5707575; 5887345; 6015520; 6134772; 6398099; 6427325; 6506332.
